

Crunchy Peppers

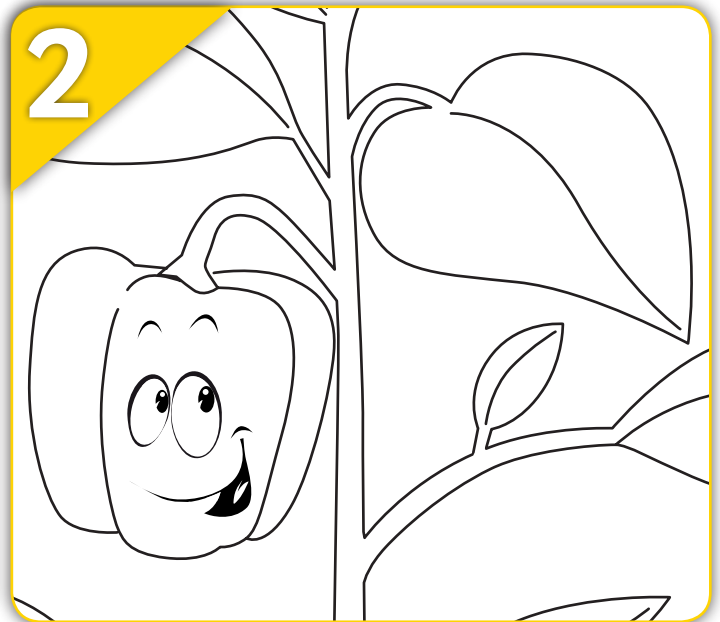

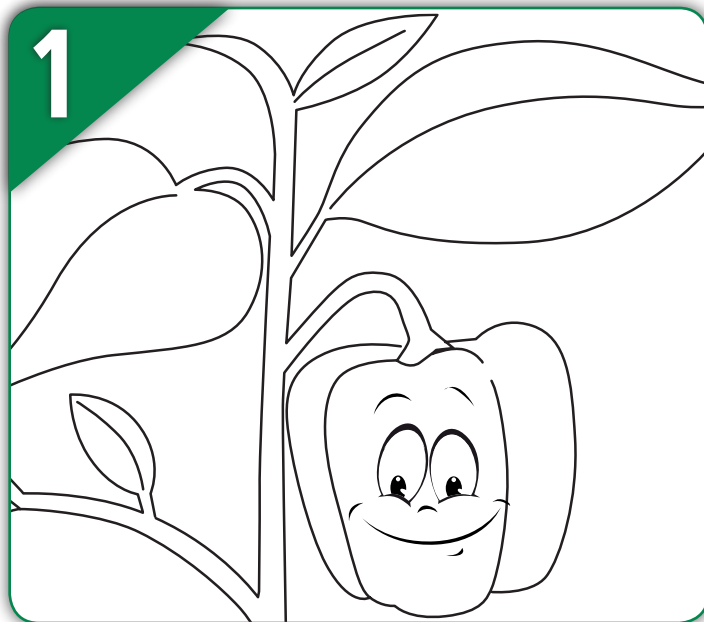

peppers of many colours

LESSON ACTIVITY PLANS Age group: 5-7 years

tesco.com/eathappyproject

Colour the peppers on each plant to show how the colours change as the peppers ripen. You can also colour the leaves and stems of the plants.

Fill in the gaps below using these words:

sweeter bitter orange yellow eaten green red

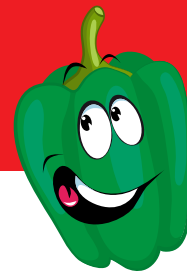

Most sweet peppers start as the colour When they are green they are not ripe, but can still be, although they can taste a little Some peppers then turn the colour, then and then finally

The longer the pepper grows on the plant, the it becomes. Red peppers are the sweetest of all. Some peppers do not turn yellow and orange, but go straight from green to red.

Answer sheet

sweeter bitter orange yellow eaten green red

Most sweet peppers start as the colour **green**. When they are green they are not ripe, but can still be **eaten**, although they can taste a little **bitter**. Some peppers then turn the colour **yellow**, then **orange** and then finally **red**.

The longer the pepper grows on the plant, the **sweeter** it becomes. Red peppers are the sweetest of all. Some peppers do not turn yellow and orange, but go straight from green to red.
