

Policy Type: Executive Expectations**Academic Achievement**

Academic achievement is important for the successful development of young people in society. Students who do well in school are better able to make the transition into adulthood and to achieve occupational and economic success. Therefore, it is important to build upon our academic foundation and establish higher expectations of our students, which includes a district culture where students are accountable and responsible for their own learning. In this, it is the Superintendent's obligation to ensure students are prepared academically at each level to become productive, responsible and successful citizens.

Adopted: December, 2017
